

BUMPER® 41.8EC
FOR CONTROL OF ASIAN RUST ON SOYBEANS
IN THE STATE OF NORTH CAROLINA

STATE RESTRICTED USE PESTICIDE

For use only by licensed or certified applicators in North Carolina. Licenses and/or certifications can be obtained through the North Carolina Department of Agriculture and Consumer Services.

**SECTION 18 EMERGENCY QUARANTINE EXEMPTION FOR THE USE OF BUMPER® 41.8EC
ON SOYBEANS FOR CONTROL OF ASIAN RUST (*Phakopsora pachyrhizi*) IN THE
STATE OF NORTH CAROLINA**

EPA FILE SYMBOL: 04-NC-15
EXPIRES: 11-10-07

ACTIVE INGREDIENT:	% BY WT.
Propiconazole: 1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl]Methyl]-1 <i>H</i> -1,2,4-triazole.....	41.8%
INERT INGREDIENTS:	<u>58.2%</u>
	TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN
WARNING-AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- **FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR DISEASE CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.**
- Follow all applicable directions, restrictions, Worker Protection Standards, and precautions on the EPA registered Bumper 41.8EC label, EPA Reg. No. 66222-42.
- This label must be in the possession of the user at the time of pesticide application.

CROP, USE RATE, AND METHOD OF APPLICATION

If soybean rust is in the area or conditions are conducive to the disease, apply 4-8 fl. oz. per acre of Bumper 41.8EC. If conditions persist, one additional application can be made 14 days after the first. It is important to protect the developing pod. Timing should be R1 (ca. 50 days after planting) to R5 depending on the conditions.

Coverage and penetration are important for best results. Bumper 41.8EC can be applied by either aerial or ground equipment. Use sufficient water volume to provide thorough and uniform plant coverage. When using aerial application, a minimum of 5 gallons per acre is recommended. With ground equipment, a minimum of 15 gallons per acre is recommended.

RESTRICTIONS

To avoid possible illegal residues: (1) Do not make more than 2 applications of propiconazole-containing products to soybeans per season. (2) Do not apply more than 0.339 pounds of the active ingredient propiconazole to soybeans per acre per year. (3) Do not rotate to any crop intended for food, grazing, or any component of animal feed or bedding within 105 days of Bumper 41.8EC application unless the crop appears on the product label. (4) Do not apply later than soybean growth stage R5 (pod fill). (5) A maximum of three total applications using approved Section 18 products collectively are allowed under this soybean rust Section 18. However, no more than two applications may be made with any given active ingredient. (6) The REI is 24 hours. (7) Do not graze or feed soybean forage or hay.

Any adverse effects resulting for the use of Bumper 41.8EC under this emergency exemption must be immediately reported to the North Carolina Department of Agriculture and Consumer Services where the application takes place.
